

Please do not change the current policy on cell phone use onboard aircraft. As a 15 year Flight Attendant, I can tell you it is hard enough to get people to turn off their phones, pda's, laptops, etc. to watch the safety demonstration now; if you allow cell phone use at any time they will completely ignore the Flight Attendants and try to talk over the safety demo announcements by just speaking LOUDER. This will not only irritate the crew, but also their fellow passengers who have no desire to listen to their inane conversation.

Thank you for your time.

Kerry Knain
